

## ***Participants Selected for IntegratedEthics Demonstration Project***

The National Center for Ethics in Health Care is pleased to announce selection of participants for the demonstration phase of IntegratedEthics, the Center's new national educational initiative.

Medical centers throughout VHA sought to be among the first to implement the new IntegratedEthics paradigm for excellence in health care ethics by applying for a slot in the demonstration project beginning in July 2005. In fact, response to the national call for applications was so enthusiastic the Center has decided to expand the planned demonstration group and convene additional workshops to accommodate the level of interest.

We congratulate the following 29 facilities (including all of VISN 11) as they join us to launch this exciting initiative:
